-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 12, 15 and 19 are objected to because of the following informalities:

Claim 19, as written, is identical to claim 7. It is assumed that claim 19 is to be dependent on claim 15.

With respect to claims 12 and 15: The limitation "wherein the socket is to be inserted by said seating portion of said lighting tube to electrically connect the electrode terminals" is unclear. It appears that the seating portion is inserted into the socket. Please explain.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-19 are allowed as best understood.

The following is a statement of reasons for the indication of allowable subject matter:

Prior art fails to show or suggest a lighting apparatus comprising a lighting tube having a lighting tube main body, a seating portion, electrode terminals and a connection portion cover, *a socket into which the seating portion of the lighting tube is inserted* to connect the electrode terminals and an adapter casing having a socket accommodation space wherein the adapter casing and the connecting

portion cover are detachably connected in a hermetically sealed manner as claimed.

The patent to Chen (6,123,433) is the art closest to the instant invention but does not disclose the socket having a space "into which the socket portion is inserted".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the patents to Troen (4,723,200) and McCoy (US 2005/0057926) as state of the art.
